

# Three Ice Melter Products to Fit Your Individual Needs:

## Highest Quality

**Ice Breaker** is our own product. It contains 90% calcium chloride, the most effective and fast-acting ice melter on the market today. Calcium chloride reacts chemically with water to generate heat.

To use, apply sparingly (2-4 oz. per sq. yard) on snow or ice up to two inches thick.

Ice Breaker is extremely effective at -32°C and even capable of working at -50°C.

Two sizes available (100 lb and 29 lb) in re-useable plastic containers.

## Environmentally Friendly

**Mountain Organic** Ice Melter is the natural choice for those concerned about the environment. It is a urea (fertilizer) based product and therefore not harmful to vegetation or the environment. Mountain Organic dissolves completely and leaves no chalky residue. It is safe for storage as it will not absorb moisture from the air.

Packaging is made from recycled materials and is recyclable where facilities exist.

It is effective up to -23°C.

## Value Priced

**Arctic Blue** Ice Melter helps control ice and snow dependably, economically and safely. Its unique blue colour makes it easier to see where ice melter has been applied, preventing over-application. An effective ice melter that is tough on snow and ice, but easy to use.

Recommended for large surface areas. Effective to -15°C.
