DEEP SCRUB

FLOOR FINISH LIFE EXTENDER

- Saves time.
- Will clean and remove damaged and dull first coats of finish on most surfaces of floors.
- A deep cleaning process.

DESCRIPTION:

DEEP SCRUB is an interim light scrub / re-coat cleaner that removes damaged and dull top coats of Floor Finish allowing easy re-application of new Floor Finish coats.

Designed to extend floor finish life, **Deep Scrub** lets you quickly remove surface floor finish coats without stripping away the complete floor finish surface.

Much faster and more economical than stripping, **Deep Scrub** leaves floors clean, bright and ready for application of a new coat of Floor Finish.

FEATURES:

An almost neutral pH restorer. Does not need to be neutralized before new floor finish coats are applied. Removes two regular coats of floor finish at a time. Mild citrus fragrance.

DIRECTIONS FOR USE:

For Automatic Scrubber: Mix 1 part of Deep Scrub into 40 parts of room temperature water. Scrub floor with 3M red pad. Simply scrub floor and pick up, needs no rinsing. Once floor is dry apply Floor Finish.

For Cord Electric 175 rpm Floor Machine: Mix 1 part of Deep Scrub into 40 parts of room temperature water. Apply liberally to floor. Run floor machine over with red pad. Pick up solution with wet vacuum immediately. Once floor is dry, apply Floor Finish.

Not designed for use without machine action.
